

KERALA FOREST DEPARTMENT

Forest Statistics 2011

Preface

The Planet Earth is the only known abode of life in the entire Solar System. Earth consists of Lithosphere, Hydrosphere, Atmosphere and Biosphere. Ecosystem in which an organism lives is continuously interacting with both biotic and abiotic factors reaching equilibrium. In this process all life forms from the smallest microbes to giant sequoia tree together with all abiotic components have vital role to play. Each individual organism has its own defined role in an ecosystem. It means all animals and plants are as important as man on this Earth. In other words all other life forms are needed for the survival of mankind. So also the clean air, clean water, food, shelter, etc are needed for the survival of mankind.

Increasing human population is putting enormous pressure on natural resources. Area under forests is reducing every year. Forest land is diverted for various developmental activities. Protection of forest land is becoming more and more difficult task in modern days.

Forest managers in the contemporary period are compelled to take many decisions, in the interest of coming generations, which are unpalatable to many. Such decisions will be scientific only when they are based on solid facts and figures.

Forest Statistics is one such effort made by Statistics Wing headed by Deputy Director (Statistics) to compile and provide the vital statistical data much needed by the policy makers to formulate future policies. It is equally needed by various Scientific Institutions, Research Scholars and students of science in their endeavour.

I hope this compilation of database about the Kerala Forest Department will be of value for various segments of the society.

Participatory Forest Management (PFM):

The State has adopted Participatory Forest Management (PFM) as a strategy for conservation of bio-diversity and for the improvement of livelihood of forest dependent people by forming partnership institutions at grass root level since 1998. The institutions in territorial forest divisions are called Vana Samrakshana Samithies (VSS). Those in sanctuaries and national parks are called Eco-Development Committees (EDC). During the year 2010-2011 there were 387 numbers of VSSs and 187 numbers of EDCs. Detailed statistics on VSS/EDC are given in tables 8.6 to 8.10 below.
